I'm resending these, since my emails may not have gone out last week.

Sorry.

Subject: EXPLO Systems - Legal Assistance Request

On our conference call with Larry Gibbs (US Army) yesterday, he repeatedly cited statute (US Law 10 USC 2629) that says DOD cannot store non-DOD material within DOD installations. We are all awaiting the contract between EXPLO and DOD to examine their claims that the M6 propellant is no longer DOD material. Can you please examine the cited statute, become familiar with it, if you aren't already and make a determination on what "exceptions" need to be requested or made to allow for EXPLO material to be housed at DOD should no alternate storage become available. We really have few to no options for locating storage. DOD has it and EXPLO has 3.7 million lbs of unsecured propellant that needs storage space. This will likely require additional discussions with the DOD attorneys as well to come up with a plan and/or options for how to make this happen. Whatever can be done on this before the meeting on Wednesday, would be greatly beneficial.

Let me know if there's anything I can do to help with this.

Thanks!

Paige Delgado
